

**13**

selecting a representative feature from each of the two or more subsets; and  
executing an image congealing algorithm to estimate warping parameters for the image using the representative features.

5

**19.** The method of claim **18**, wherein a number of the representative features is less than 3% of a total number of the features.

**20.** The method of claim **18**, comprising integrating the unsupervised feature selection algorithm with the image  
congealing algorithm.
